

AP300[™] SMR MOST ADVANCED, PROVEN & READILY DEPLOYABLE SMR SOLUTION

AP1000® and AP300[™] are trademarks or registered trademarks of Westinghouse Electric Company LLC, its affiliates and/or its subsidiaries in the United States of America and may be registered in other countries throughout the world. All rights reserved. Unauthorized us is strictly prohibited. Other names may be trademarks of their respective owners.

As the world faces the challenges of climate change and energy security, the need for proven solutions that deliver reliable, costeffective, clean and safe energy has never been greater.

WHERE A STREET, A STREET, A STREET, A STREET, A STREET, A STREET, AND A STREET, A STREET,

based on deployed, operating & advanced reactor technology

Westinghouse AP300 Small Modular Reactor

LEGACY OF INNOVATION

Westinghouse proudly brings 70 years of experience developing & implementing new nuclear technologies that enable, reliable, clean, safe and economical sources of energy for generations to come.

We pioneered passive safety systems. AP300 utilizes identical passive safety systems used in the AP1000 reactor to maintain safe shutdown condition.

PROVEN TECHNOLOGY

Our AP300 SMR leverages tens of millions of hours on AP1000[®] reactor development. The AP300 SMR technology builds upon the success of AP1000 reactors currently operating around the globe.

READILY DEPLOYABLE

Gain the benefits of the Westinghouse AP1000 PWR technology in a smaller power output to augment the backbone of your community energy system.

WESTINGHOUSE TECHNOLOGY IS THE BASIS FOR APPROXIMATELY 50% OF THE WORLD'S **OPERATING NUCLEAR PLANTS.**

BASED ON LICENSED AP1000° TECHNOLOGY +25 REACTOR YEARS OF OPERATIONAL PEDIGREE

BASED ON REAL-WORLD PROVEN TECHNOLOGY

The AP300 SMR, 330MWe (990MWth), is based on the licensed AP1000 pressurized light water technology that has demonstrated industry leading reliability.

More than 30 years licensing advanced passive safety technologies with global regulators

Westinghouse is a world leader in delivering nuclear fuel. AP300 SMR utilizes our robust fuel design that incorporates a variety of proven and advanced fuel features.

330MWe (990MWth)
1-loop PWR with proven,
demonstrated reliability

Proven pedigree throughout the plant lifecycle ensures deployment & long-term operations success

Uses advanced, proven I&C technology to simplify operations and increase reliability.

Uses identical technology as the AP1000 reactor including: design & licensing methodologies, major equipment & components, passive safety systems, proven fuel and supply chain.

Advanced Passive Safety based on AP1000 technology brings licensing certainty

AP300 SMR's smaller safety related footprint reduces construction, operating & maintenance costs

ADVANCED SAFETY

The AP300 SMR is based on proven AP1000 passive safety systems that have been extensively analyzed and tested to improve the safety of the plant. Global regulators have reviewed these systems and determined that they meet advanced safety criteria.

Fail Safe

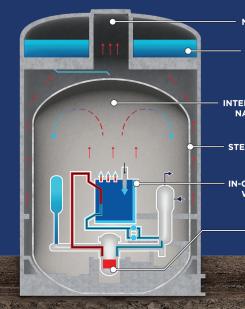

Designed to achieve and maintain safe shutdown condition without operator action, back-up power or pumps

Self Sufficient

Passive approach to safety system operation eliminates the need for backup power & cooling supply

Hazard Proof Protected by a robust containment designed to withstand extreme external hazards

Defense in Depth Multiple layers of defense for accident mitigation

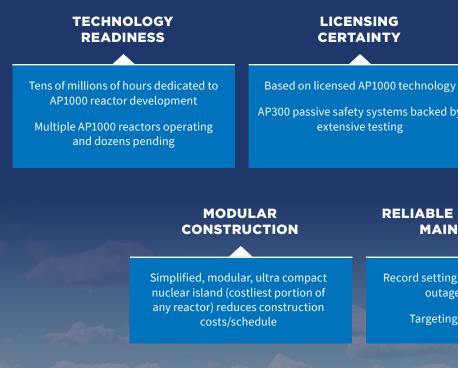

READILY DEPLOYABLE

AP300 SMR has a proven pedigree throughout the plant lifecycle. For customers this means risk reduction leading to smoother deployment and operational success.

HERE IS WHAT WESTINGHOUSE CAN DELIVER

APPLICATION VERSATILITY

AP300 SMR is the backbone of a community clean energy system. Flexible performance provides a proven capability to stabilize modern renewable heavy electric grids, including fast load change capabilities to support variations in demand. Includes additional capability to support district heating, desalination and hydrogen production.

LICENSING CERTAINTY

AP300 passive safety systems backed by extensive testing

ESTABLISHED SUPPLY CHAIN

Incumbent AP1000 suppliers can deliver major equipment

Demonstrated capability to localize supply chain

RELIABLE OPERATIONS & MAINTENANCE

Record setting AP1000 operational & outage performance

Targeting 80-year life cycle

MORE THAN 10,000 EMPLOYEES IN OVER 70 GLOBAL **BEST-IN-CLASS NUCLEAR & FUEL MANUFACTURING FACILITIES & ESTABLISHED SUPPLY CHAIN.**
