

Srini Gopalan

President, Instrumentation & Control Systems

Srini Gopalan is president, Instrumentation & Control (I&C) Systems at Westinghouse Electric Company. In this role, he is responsible for the I&C business portfolio, including business performance and growth, safety, quality, product strategy, execution and delivery of I&C systems to support the global nuclear plant customers and market.

Mr. Gopalan has spent more than 20 years in leadership positions at Westinghouse supporting the new and operating plant market. Most recently, he served as vice president of Global Instrumentation & Control Systems, with responsibility for all engineering, manufacturing and delivery of Westinghouse I&C systems to support global customer needs.

Mr. Gopalan has more than three decades of global energy industry experience – serving in leadership positions in engineering, product development, project execution and field services, including plant construction and startup.

Mr. Gopalan earned a bachelor's degree in Instrumentation and Control Systems from India's Bharathiar University, an MBA from the University of Pittsburgh and an executive certification from INSEAD.
