eVinci™ Microreactor

A resilient and reliable “nuclear battery”

Rapid Development

Manufacturing facilities already online, test reactor construction soon to begin

Factory Built & Fueled

Fueled before deployment, the eVinci microreactor will be mass-manufactured

Secure Construction

Constructed above ground with small site footprint; installation < 30 days

Uninterrupted, Secure Energy

Each eVinci microreactor provides 8+ years of uninterrupted energy

Simple Design

No water or pressurized gas is needed for cooling; easy to operate and maintain

Highly Transportable

Transportable by road, rail or water to its final installation location

Data Centers
