

Luca Oriani

President
APX

Luca Oriani is President of APX at Westinghouse Electric Company. In this role, he leads the execution capabilities to deliver new plant projects across the world – including the AP1000® PWR projects and its technology derivatives. He is accountable to oversee these global projects and the supporting supply chain and related engineering and component manufacturing.

Most recently, Dr. Oriani served as President of Westinghouse's Long-term Operations business – leading the development and delivery of innovative solutions across engineered solutions, instrumentation & controls system, training & resource solutions and parts that support the global operating fleet.

Dr. Oriani has worked at Westinghouse for over 23 years – starting as a senior engineer and advancing to leadership roles in engineering and licensing for operating plants and advanced reactor technology, including the design and completion of the first Westinghouse advanced AP1000 units in China and the United States. He also served as Westinghouse's Global Chief Engineering Services Officer.

Dr. Oriani holds doctorate and master's degrees in Nuclear Engineering from Polytechnic University of Milan in Italy.
