

Ben Solich

President, Parts

Ben Solich is president of Parts at Westinghouse Electric Company. In this role, he is responsible for the sales, product development, engineering and operations to support the delivery of nuclear parts and products to plants around the world.

With more than two decades of experience in the energy sector, Mr. Solich began his career at Dow Chemical and spent ten years there before joining Westinghouse in 2007.

At Westinghouse, he played a key role in supplying major components to AP1000® nuclear reactors and contributing to the engineering and design of the AP1000 reactors for the Sanmen and Haiyang Nuclear Plants in China. Mr. Solich also served in leadership within supplier performance before serving as the vice president of Sales for the Parts business.

He earned a bachelor's in chemical engineering from the Pennsylvania State University and an Executive MBA from the University of Pittsburgh.
