

## **David Durham**

President, Energy Systems

David Durham is President, Energy Systems at Westinghouse Electric Company. In this role, he leads the global business for Westinghouse AP1000® reactors, small modular reactors and micro reactors, as well as advanced reactor development and other non-nuclear energy systems.

Mr. Durham joined Westinghouse in 2015, as Senior Vice President, New Projects Business, and President of WECTEC LLC, a wholly-owned Westinghouse subsidiary that provides engineering and construction support services to AP1000 plant projects in China and the U.S., as well as government services and contingency staffing services. He assumed responsibility for Westinghouse's AP1000 plant projects and Decommissioning business lines early in 2017, serving as President, Plant Solutions Business.

Prior to Westinghouse, Mr. Durham was Senior Vice President and Chief Commercial Officer at GE Hitachi Nuclear Energy. Previously, he was Vice President of Fluor Corporation, leading commercial activities for the company's global nuclear power and government businesses.

Earlier in his career, Mr. Durham served in the administration of U.S. President George H.W. Bush, overseeing the creation and operations of the defense nuclear facilities decommissioning and cleanup program for Energy Secretary James Watkins, as well as federal facilities enforcement for U.S. Environmental Protection Agency Administrator Bill Reilly.

Mr. Durham holds bachelor's degrees in foreign affairs and history from Assumption College and a Juris Doctor degree from the George Washington University National Law Center.
